

ZEELANDER

ZEELANDER PRESS RELEASE 01/06/2009 (FOR IMMEDIATE RELEASE)  
ZEELANDER MAKES AN ENTRANCE: TRAVEL IN STYLE DURING THE GAASTRA DRAGON WORLDS 2009  
IN MEDEMBLIK THE NETHERLANDS 3-11 SEPTEMBER 2009

Over the nine days of the 2009 Gaastra Dragon Worlds, two Zeelanders will premiere at Medemblik, the ultimate Dragon destination. During this time, Zeelander will be the elite vehicle of choice to some of the Festival's most exclusive VIP's. This will be offered as a complimentary service to special guests of the Festival and Gaastra VIP's.

Zeelander is therefore delighted to partner with Gaastra Dragon Worlds 2009 as Official Yacht Sponsor for the private view and launch of this prestigious new marquee.

Zeelander describes the Dragons as "a premier luxury brand in leisure and recreation water sports as a perfect complement to Zeelander's marquee. Our yachts are not only the future of design and innovation, but they also embody the ultimate boating experience with a perfect balance of speed, glamour and technical expertise. Zeelanders are extremely fast and silent but it is the style that turns heads wherever they go. They exhibit an elite star power synonymous with both the Dragon Worlds and Gaastra and are definitive of the lifestyle that goes with it".

**About Zeelander:**

It is the relentless pursuit of perfection that underpins Zeelander's working practice. Zeelander is the result of an exhaustive creative process to produce the most refined, small super yacht that makes absolutely no compromise, from design, naval architecture, hull design, and sound engineering to its custom interiors.

The finished Dutch product is defined by a collaboration with major industry leaders and is underwritten by Dutch design standards – benchmarks that make Holland unassailable world leaders in super yacht production today. The boat's blistering performance is achieved through the hull design of acknowledged super yacht Master naval architect Frank Mulder coupled with advanced technology Volvo IPS engines. The stiffness of the carbon Kevlar reinforced hull, the deep forward V and narrow entry mean the velvet ride is simply unheard of on other yachts. The brilliant cut-aways at the transom simply "un-glue" the Zeelander as she accelerates allowing effortless power, control and precision.

This is no ordinary yacht – simplified in concept, she is probably the most driver-orientated vehicle on the water; effortless to manoeuvre, easy to understand with familiar controls that allow any car driver to grasp the joystick and dock the Zeelander with ease.

She is no fair-weather sailor either and is capable of covering extremely long distances. Her specially designed and proven hull allow her to handle seas no other yacht in her class can consider – which means there is no other yacht in her class.

ZEELANDER

Styling is by award winning designer Cor D. Rover, whose ability to bring the freshest yet most timeless designs makes him the most in-demand superyacht designer today. The profile of Zeelander suggests a machine of effortless power. The design makes it easy to imagine her speeding profile even when moored in the harbour; Zeelander inspires her admirers to be out on the sea.

Zeelander is beautifully proportioned, and is about lifestyle, performance and design. Her classic lines exude style. The flawless profile changes from all perspectives and transforms in every light. Swinging at anchor, her smooth curves and signature transom reminds one of the graceful gentleman's launch of the golden era of yachting. Zeelander really is a visual treat; from all angles recognizable, from no two angles the same. She is a smooth, flowing vessel, high-lighted with rich mahogany, gold-sprinkled paint, stainless steel and sensuous leathers.

The creators of Zeelander have strived endlessly to test and perfect every area of the yacht. When they were satisfied with the result they re-addressed the quality by ensuring the highest levels of craftsmanship at every level. A multi-skilled team well versed in both traditional skills and using the most advanced and cutting edge technology have created an interior that is unsurpassed in terms of quality and attention to detail. All finishes are made to touch and feel and every material used in the boat has been carefully selected to reflect the lifestyle and philosophy behind it. Sumptuous leather, rich veneers and sculpted stainless steel create the Zeelander world of luxury and comfort.

Zeelander was conceived as the 'one yacht' everyone aspires to; be it the owner of a fast commuter boat or a world-class mega yacht. To achieve that, Zeelander has to excel in all areas and the smoothness of ride is no exception - it is exceptional. Unsurprisingly, it has been difficult to keep Zeelander a secret. With no exposure and only word of mouth there is already a waiting list. So popular has the concept proved to be, based around superlative engineering, refined interiors and recreational qualities, that Zeelander will be doubling production in 2010.
